

Press Release

STREETWAY ELEC: a complementary solution for emission-free city transport

With the **STREETWAY ELEC**, IVECO BUS extends its offer for zero-emission mobility to meet the different requirements of targeted markets in Central, Eastern and Southern Europe, Africa, the Middle East and Asia. Silent and emission-free, the **STREETWAY ELEC** offers:

- The same modular battery concept as other full electric IVECO BUS models.
- Compliance with the most widespread European product and safety standards.

Vénissieux, 6 October 2023

The full electric **STREETWAY ELEC** benefits from the robustness and efficiency characteristics of the STREETWAY models.

The **STREETWAY ELEC** is a low-floor city bus, available in a 12-metre-long version. It is equipped with a 310-kW VOITH electric motor and, like the entire IVECO BUS electromobility offering, benefits from the latest NMC Li-ion battery technology assembled by FPT Industrial.

This modular energy storage architecture offers a choice of combinations of 5, 6 or 7 battery packs distributed between the roof and the rear of the vehicle to deliver an overall 346 kWh, 416 kWh and 485 kWh respectively. The extended battery capacity enables a range of up to 400 km to comply with the most demanding missions and customer expectations.

It is designed for all-day use with night-time recharging at the depot using COMBO 2 CSS plug-in (duration: up to 5 hours depending on the charging system capacity, max 150 kW).

The **STREETWAY ELEC** is available with a choice of two or three access doors and can accommodate more than 90 passengers. The passengers' accessibility has been improved, offering a new 5-seat area in the rear section of the vehicle.

IVECO BUS

IVECO BUS is a brand of Iveco Group N.V. (EXM: IVG), a global leader in commercial and specialty vehicles, powertrain, and financial services, listed on the Borsa Italiana in Milan.

With a worldwide presence and a leading position in Europe in sustainable public transport, IVECO BUS supports public and private operators in all their missions, with an offer of global mobility solutions available in different energies, such as electric or powered by compressed natural gas compatible with biomethane.

The overall offer includes:

- school, intercity and tourism coaches;*
- standard and articulated city buses, including BRT dedicated versions; city midibuses*
- minibuses for all passenger transport missions.*
- connectivity and fleet management services available through IVECO ON*
- a portfolio of products and services with Energy Mobility Solutions, from simulations and design to the supply of charging stations, and installation and maintenance of the charging infrastructure*

The extensive IVECO BUS and IVECO service network guarantees assistance around the world wherever an Iveco Bus vehicle is at work.

IVECO BUS employs over 5,000 people across five production units, in Annonay and Rorthais, France, Vysoké Myto, Czech Republic, Brescia and Foggia, Italy.
