

Press Release

IVECO BUS extends its full electric line-up with STREETWAY ELEC version

IVECO BUS launches the **full electric version of its STREETWAY** city bus. With this new model, the brand extends its offer for zero-emission mobility, which meets the different requirements of targeted markets in Central, Eastern and Southern Europe, Africa, the Middle East and Asia.

- The same modular battery concept as other full electric IVECO BUS models.
- Compliance with the most widespread European product and safety standards.

Vénissieux, 24th May 2023

A complementary solution for emission-free urban transport

The full electric version benefits from the robustness and efficiency characteristics of the STREETWAY models. Silent and emission-free, **STREETWAY ELEC** offers a new mobility solution that respects the environment and public health, and whose quiet operation will be appreciated by the driver, passengers, and residents.

The new **STREETWAY ELEC** is a low-floor city bus, available in a 12-metre-long version. It is equipped with a 310-kW VOITH electric motor and, like the entire IVECO BUS electromobility offering, benefits from the latest NMC Li-ion battery technology assembled by FPT.

This modular energy storage architecture offers a choice of combinations of 5, 6 or 7 battery packs distributed between the roof and at the rear of the vehicle to deliver overall 346, 416 or 485 kWh respectively. The extended battery capacity enables a range of up to 400 km to comply with most demanding mission and customer expectations.

It is designed for all-day use with night-time recharging at the depot using COMBO 2 CSS plug-in (duration: up to 5 hours depending on the charging system capacity, max 150 kW).

The **STREETWAY ELEC** is available with a choice of two or three access doors and can accommodate more than 90 passengers. The passengers' accessibility has been improved, offering a new 5 seats area on the rear part.

IVECO BUS

IVECO BUS is a brand of Iveco Group N.V., a global leader in commercial and specialty vehicles, powertrain, and financial services, listed on the Borsa Italiana in Milan.

A major player in the field of public transport, and among the leading bus and coach manufacturers in Europe, IVECO BUS designs, manufactures and markets a broad range of vehicles that meets all the needs of public and private operators:

- school, intercity and tourism coaches;*
- standard and articulated city buses, including BRT dedicated versions; city midibuses*
- minibuses for all passenger transport missions.*

IVECO BUS benefits from a strong expertise in alternative energies vehicles and is now capable of offering a complete range running on compressed natural gas – fully compatible with biomethane – and in the electromobility field, to suit every kind of transport need. Thus, IVECO BUS positions itself as a reference partner to face the numerous challenges of sustainable mobility.

IVECO BUS employs over 5,000 people across four production units, in Annonay, France, Vysoké Myto, Czech Republic, Brescia, Italy and in Rorthais, France with its electromobility center of excellence.

The extensive IVECO BUS and IVECO service network guarantees assistance around the world wherever an Iveco Bus vehicle is at work.
